Application Developer | Software Project Management

Innovative and diversified Software Application Developer, with a solid history of design and development expertise. Talent for identifying, isolating and resolving coding issues and analyzing end-user needs to align capabilities with overall objectives. Accomplished developer, building software solutions for high-growth organizations like Sony, Pandora, and MLB, and creating a stronger posture within competitive markets.

- Software Development
- JavaScript, jQuery, HTML, CSS, Qt/QML, XUL
- Quality Assurance & Testing
- Object Oriented Programming
- Client Relationship Mgmt.
- Exceptional Telecommuting Skills
- Agile Methodologies
- Full Life Cycle Project Management
- JIRA/HEAT Help Desk

Career Experience

D-LINK SYSTEMS INC., Fountain Valley, CA

Demonstrated exceptional finesse working autonomously, driving production of robust software solutions, managing the technical-end of multiple set-top boxes and developed and maintained code utilizing JavaScript, Qt, Python and XUL.

SENIOR APPLICATION DEVELOPER - TELECOMMUTE (2013 – 2017)

- Led technical support operations, designed application UI mockups and assets, utilizing Photoshop. Modified code, resolving errors and to control potentially negative impacts to the production lifecycle.
- Nurtured partnerships with 3rd party developers to facilitate the development and launch of set-top applications.

BOXEE INC., New York, NY

Content manager & lead application developer of native and intuitive set-top applications. Developed PHP web crawlers to aggregate movie and TV data, enabling the design of a more intuitive set-top box.

APPLICATION DEVELOPER - TELECOMMUTE (2009 – 2013)

- Worked collaboratively with industry moguls like Sony, MLB, NHL, TED, and Pandora, to pioneer proprietary software solutions that launched them into leading roles within a highly competitive market.
- Developed application API's, maintaining the API documentation, and created internal web application to validate content XML documents, from partners, integrating video, etc., into the platform.
- Developed and maintained playback control scripts integrating set top box remote to video playback in internal browser utilizing JavaScript.

TD BANK NA, Mount Laurel, NJ

Worked both in a team setting & autonomously, as the on-call agent, providing multi-tiered troubleshooting. Effectively enhanced resolution times, and managed queries at various threat levels.

IT SERVICE DESK | LEVEL 2 REPRESENTATIVE (2007 - 2009)

- Created a comprehensive knowledge-base, ensuring high levels of proficiency. Consistently updated information and delivered employee training. Redesigned help desk logo using Inkscape vector software.
